REMARKS

50X1-HUM

1. On 28 August 1951, 46 ground attack aircraft and 2 single-engine high-wing monoplanes were observed on the northern edge of Reinsdorf airfield. The weather was very bad and no flights were made. Motor vehicles were seen at the parking lot of the field. *
2. A fuel dump consisting of one large horizontal container and three vertical containers which were approximately the size of railroad tank cars was observed in the woods on the southern edge of the field. Three piles of bomb crates were seen about 70 meters from the dump. The piles were about 3.5 x 5.5 x 2.5 meters large. It could not be determined whether the crates were full or empty. The dump was guarded.
3. Between 9 a.m. and 1 p.m. on 5 September, 51 ground attack aircraft parked in two rows and 2 biplanes were observed on the northern edge of the field. The planes were marked by white-bordered red Soviet stars. There was only a little flying by biplanes. Trucks were observed on the approach road to the field.

* Comment. It appears that the occupation of the field has not changed. A ground attack regiment is still believed to be stationed there. The motor vehicle belong to the ground unit of this regiment. The single-engine high-wing monoplanes were Yak-14s.
